

ARRETIL®

Water-soluble before work cream to help keep skin healthy when working with multi-component resins (epoxy and polyester), organic solvents, thinners, mineral oils, fats and cutting oils.

Description

ARRETIL® is a water-soluble, non-fatty, and silicone-free before work cream. The high pigment content (talc and kaolin) helps support the natural function of the skin when exposed to many workplace substances. ARRETIL® is recommended for use in areas where water-repellent substances are used such as: organic solvents, thinners, mineral oils and fats, cutting oils. It has also been effective when skin comes in contact with multicomponent resins (epoxy and polyester).

Areas of Application

Machine shops
Airline mechanics
Resin manufacturing, resin curing
Areas where adhesives are often used

Instructions for Use

- Thoroughly wash and dry skin before starting work as well as after every break.
- Apply ARRETIL® to hands and exposed skin making sure to cover all areas, including between fingers and around finger nails.
- ARRETIL® must be reapplied after contact with water.
- ARRETIL® may also be used on the face.

Packaging Sizes

100ml tube

1000ml SOFTBOTTLE®

(to be used with the STOKO VARIO ULTRA® or STOKO VARIO® SVP dispensers)

Product Description

Off-white, unscented, silicone-free, cream of the oil-in-water emulsion type. Density (at 20° C): 1.02 g/cm³; pH value: approx. 9.

Features

Water soluble cream, non fatty and silicone-free

Water soluble

High content of talc and kaolin

Available in 1000ml softbottles or tubes

Benefits

Great for working with water-repellent substances such as organic solvents, mineral oils and fats, cutting oils, thinners and multicomponent resins (epoxy and polyester)

Easy to clean up with regular soap and water

Soothes the top layer of the skin

Can be available to employees in specific work areas with a dispenser or assigned to specific employees in individual tubes

Qualitative Composition

INCI DECLARATION*:

Water
Talc
Kaolin
Potassium Stearate
Glycerin
Petrolatum
Lanolin Alcohol
Algin
Methylparaben
Dehydroacetic Acid
Sorbic Acid
Propylparaben

The ingredient declarations used are in compliance with the International Nomenclature for Cosmetic Ingredients (INCI).

Shelf Life

ARRETIL® can be stored in a closed container at room temperature for at least 30 months at room temperature.

STOKO® Skin Care products are tested for stability at temperatures between 23°F and 104°F. When tested at temperatures below 41°F and above 86°F, the products begin to fluctuate in viscosity.

Material Safety Data Sheets

MSDS is available at www.stokoskincare.com.

First Aid

Should product accidentally enter the eyes, rinse out with plenty of water. Do not rub eyes. Contact a physician if burning sensation persists.

Effectiveness Test

The soothing effect of ARRETIL® against organic solvents has been determined by means of the in vitro test method using the membrane filter test according to Czetsch-Lindenwald.

Skin Compatibility Tests

ARRETIL® has been thoroughly tested for its skin compatibility in human experiments using the scarified Duhring Chamber Test according to Frosch and Kligman. Skin Compatibility Certificate from the Dermatological Clinic of the Municipal Hospital, Krefeld, Germany available upon request. It has a good skin compatibility.

Additional Information

Frequent contact with materials that stress the skin also require the use of special skin creams before and during work, as well as the application of skin care products after work. Customer service at STOKO® Skin Care will gladly assist you in the right combination of products.

Occupational skin irritation, frequent washing or harsh climates can lead to dry, rough and chapped skin. This condition can result in irritation/rupture of the outer layer of the skin which impairs its natural protective function. As a prophylactic measure against such damage or to regenerate damaged tissue after work, the skin should be regularly treated with a conditioning product such as STOKOLAN®, STOKO® LOTION or STOKO VITAN®.
